

# CUSHIONS & Options

Cisco Brothers offers filling options for seat and back cushions. Most frames are available with these cushion options. All seat and back cushions include a canvas cover under the fabric cover.

**Using foam offers consistent support, creamier feel and reliable performance.**

## Seat Options

### Soft Fill

Soft-Fill cushions, offered standard on all pieces, is durable, comfortable, and requires little maintenance. The soft fill seat consists of a foam core encased in two layers of polyester fiber wrap for extra softness. The polyester is air spun so it will not clump or crumble over time.

### Feather Cloud

Feather Cloud is softer and more luxurious than Soft-Fill. The seat consists of the same foam core insert used in Soft-Fill cushions, but is surrounded by a channeled envelope filled with 45% organic feathers, 5% down, and 50% polyester fibers. Channels prevent shifting and clumping. Feathers and Down are pre-washed and air-blown at our factory to reduce dander. Feather Cloud is our most popular fill – offering great comfort and value.

### Feathers and Down

Our top-of-the-line cushions are Feathers and Down. The seat consists of the same foam core used in Soft-Fill cushions, but is surrounded by a channeled envelope of 90% organic feathers and 10% down. The cover is made of cotton, down proof ticking. Feathers and Down back cushions are channeled into cotton envelopes to prevent shifting and clumping. Feathers and down are pre-washed and air-blown at our factory to reduce dander. Even though this mixture requires a bit more fluffing, the luxury and comfort are unsurpassed.

### 10/90 No Core

This cushion option has the same qualities as Feathers and Down, but with no foam core. These cushions require regular fluffing, but literally envelop you in comfort, giving a sense of old world luxury.

## Seat Options (Cont'd)

### Faux Feather

Faux feather is a synthetic alternative to our feather down option. It is made of 100% polyester fibers. The soft fiber creates the ultimate down-like sitting experience. We recommend this option for those that are allergic to feathers, but still want the luxurious feel of the Feather/Down option that our basic Soft-Fill does not provide. The seat consists of the same foam core insert used in Soft-Fill cushions, but instead of the two layers of polyester fiber wrap it is surrounded by a channeled envelope filled with polyester fibers.

### Para Feather

Para Feather is our Feather and Down equivalent to our Inside Green technology. The seat consists of a Dunlop Latex core and surrounded by a channeled envelope of 90% organic feathers and 10% down. The cover is made of 100% organic cotton down proof ticking. Please keep in mind this seat option requires regular fluffing and flipping to maintain its shape over time.

### Para Pure

Para Pure is an alternative in our Inside Green technology. This seat option consists of the same Dunlop Latex core wrapped in layers of cotton and wool. This is a great option for those who are allergic to feathers.

### Topper (Item Specific)

Our Topper is a slim loose cushion made with 10/90 feathers and down. Because it is designed to be a floppy cloudlike look it does not have a foam core and appears to be under stuffed.

# Back Options & Pillows

**NOTE:** Back Cushions Do Not Have a Foam Core

## Soft Fill

Our Soft Fill back cushions are made with muslin channels filled with polyester fibers. The channels prevent shifting and clumping. Soft fill back cushions are offered as a standard for all of our pieces. It provides a durable firm back support.

## Feather Cloud

Feather Cloud is a softer option than Soft Fill. It is a channeled back cushion filled with 50% polyester fibers, 45% organic feathers, and 5% down. Although the channels help prevent shifting and clumping, regular fluffing and flipping is recommended to maintain the cushions' original shape. Feather cloud is our most popular fill – offering a great comfort and value.

## Feather and Down

Our top-of-the-line cushions are Feathers and Down. The cushion consists of the same polyester fibers used in Soft-Fill cushions, but is surrounded by a channeled envelope of 90% organic feathers and 10% down. The cover is made of cotton, down proof ticking. Feathers and Down back cushions are channeled into cotton envelopes to prevent shifting and clumping. Feathers and down are pre-washed and air-blown at our factory to reduce dander. Even though this mixture requires a bit more fluffing, the luxury and comfort are unsurpassed.

## Faux Feather

Faux feather is a synthetic alternative to our feather down option. It is made of 100% polyester fibers. The soft fiber creates the ultimate down-like sitting experience. We recommend this option for those that are allergic to feathers, but still want the luxurious feel of the Feather/Down option that our basic Soft-Fill does not provide.

## Back Options & Pillows (Cont'd)

**NOTE:** Back Cushions Do Not Have a Foam Core

### Para Feather

Para Feather is our Feather and Down equivalent in our Inside Green technology. It is the same as our feather and down back cushion. It is a channeled insert filled with 90% Organic feathers and 10% down with a 100% Organic cotton down proof ticking cover. The built in channels help prevent the feathers from shifting and clumping. Even though this option requires more fluffing, the luxury and comfort are unsurpassed.

### Para Pure

Para Pure is an alternative cushion in our Inside Green Technology. It consists of 1" Dunlop Latex wrapped in layers of wool. This cushion has a slight bounce, because the latex and wool do not give as easily as feathers do when you sit. It is a firmer back support. Para pure is a great option for those who are allergic to feathers.
